

Team Bio Page Roadmap

1. Create wireframes and folder structure
2. Code the HTML and CSS
3. Add and edit the images required
4. Code the accompanying javascript file
5. Stylize the webpage
6. Create Readme
7. Create Roadmap
8. Push to github

Goal: Our objective for this project was to make a java-functional webpage that changed information based on which member's picture was selected on the cursor's click.

Solution: Create an array in java (.js file) to hold the bio information, create a function and box to hold the info.
